Highlights

PowerCyclone technology

The PowerCyclone technology delivers best cleaning results in one go through 3 highly efficient steps: 1) Air enters fast into the PowerCyclone thanks to the straight and smooth air inlet. 2) The curved airpass quickly accelerates the air upwards in the cyclonic chamber. 3) At the top of the cyclone, the exit blades effectively cut out the dust from the air.

2000 Watt motor

The 2000 Watt motor generates max. 360 Watt suction power for high performance.

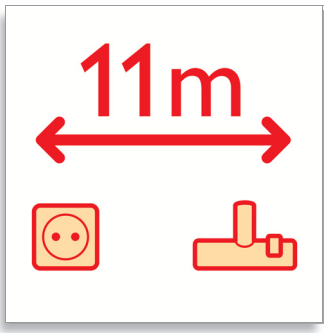
Easy to empty dust container

The dust container is perfectly designed to dispose dust without creating a dust cloud. Thanks to its unique shape and smooth surface, dust is collected at one side of the container and evenly glides into the dust bin.

Life-long washable foam filter

The foam filter can be easily washed under the tap for life-long performance.

11 m action radius



Philips vacuum cleaner with an extra long reach gives you more cleaning convenience.
